

Miniature garden

To make your mini garden you will need this print out, cress seeds, compost, egg carton and scissors. Then stick the artwork onto card and carefully cut along the dotted lines. Fill the lid of the egg carton with compost. Sprinkle the seeds into the box and water. Once the seedlings appear you can decorate your mini garden by pushing your card cuts outs into the soil!

Top Tip!

Take out your little garden decorations before watering or they will become soggy. This could be avoided by laminating each item.

We made one here!
